L'VOV PLANT BOOSTS BULB OUTPUT;
PORCELAIN FITTINGS SCARCE

SPEED BULB ASSEMBLY -- Izvestiya, 17 Jun 50

Lines and revolving tables in the assembly shop of the L'vov Electric Bulb Plant are now moving 15-20 percent faster, thanks to an innovation by fitter Viktor Vasil'yev. A brigade can now assemble 2,500-3,000 more bulbs per shift than previously. By the end of the year the plant should have exceeded its planned output by hundreds of thousands of bulbs.

HOUSING DELAYED BY LACK OF ELECTRICAL ITEMS -- Izvestiya, 24 Jun 50

The completion of living quarters is frequently delayed because national and local industry has failed to supply sufficient porcelain fittings for the electric lighting systems. Insulators, sockets, wire guides, and other fittings are in short supply.

It is up to the Ministry of Electrical Industry USSR, the Ministry of Local Industry RSFSR, and the RSFSR Administration of Industrial Cooperatives to see that builders have adequate quantities of such fittings.

MAKES NEW MOTOR FOR MINING MACHINERY -- Trud, 3 Jun 50

The Kemerovo Machinery Plant has put a new electric motor into series production. The motor is designed for use in scraper conveyers, earth loaders, and other mining machinery. The new motors are more compact than those produced previously, and are highly efficient.

LENINGRAD AREA GETS CONTROL PANELS FROM ARMENIA -- Kommunist, 5 Jul 50

The Yerevan Electrical-Machine-Building Plant is now producing control panels for rural electric power stations. All parts for the panels, except the electric measuring instruments, are made at the plant.

The first consignment of these panels has been sent to power stations in the Leningrad area.

CONFERENCE DISCUSSES INDUSTRIAL X-RAY -- Leningradskaya Pravda, 25 Jun 50

Scientists and engineers of 60 cities of the USSR recently attended a meeting in Leningrad at which the application of X-ray in industry was discussed.

Speakers pointed out that Leningrad enterprises have already put X-ray processes into wide application. They are being used in inspection of welded seams, and in observing stresses in parts undergoing machining. In addition to structural inspection, X-rays are used in spectral analysis of metal.

NAME ELECTRIC MOTOR CONSUMERS -- Sovetskaya Litva, 24 Jun 50

The Vil'nyus El'fa Plant builds electric motors for plants in Vil'nyus, Kaunas, Shyaulyay, Klappeda, and many other cities. Other customers include kolkhozes and sovkhoses of Latvian SSR.

BENDS COLD PIPE -- Leningradskaya Pravda, 10 Jun 50

The Kiev Electrical Machinery Plant has put into production a new type of pipe-bending machine, in which the pipe is bent without preliminary heating.

BEGIN GENERATOR PRODUCTION -- Vechernyaya Moskva, 1 Jul 50

The Moscow Electrical-Machine-Building Plant imeni Vladimir Il'ich has begun production of generators for rural power stations.

SERIES-PRODUCE GENERATORS -- Leninskoye Znanya, 10 May 50

The Riga Machinery Plant has begun series production of portable electric generators. They are designed for use in logging operations where electric saws and other power tools are employed.

NEW DEVICE TO AID RADIO BUILDERS -- Vechernyaya Moskva, 21 Jun 50

The Fizelektropribor Plant has produced a new instrument which measures voltage and amperage of currents and the resistance of conductors, all with extreme accuracy. It is designed for use in carrying out complex work in the construction of radio apparatus.

By the end of June the plant will have put out 400 of these instruments.

BEGINS MANUFACTURE OF TRANSFORMERS -- Kommunist, 16 May 50

The Pyatigorskiy Electrical Machinery Plant of Glavsel'elektro (Main Administration of Agricultural Electrical Equipment) has begun production of transformers for rural power stations.
